

TrustWorks®

## TrustWorks®

*Simplified and Automated Case Administration*

- No Cost Web-Based Case Administration Software
- Streamlined Workflow & Document Management
- Automated Claims Distribution
- Reconciled Claims Management
- Integrated & Secure Banking Services
- Custom Web Portal for Constituent Communications

## Our fully-automated Case Administration & Claims Distribution Solution

As the leading provider of case administration and claims distribution software for over 25 years, BMS created TrustWorks to provide bankruptcy, restructuring and other fiduciaries with software solutions to streamline case administration for liquidating engagements, assignments for the benefit of creditors and receiverships.

TrustWorks is the only software solution with completely integrated banking, claims management, workflow tracking, and complex distribution capabilities. Easy to incorporate, user friendly and intuitive, TrustWorks streamlines case administration while eliminating the errors common to data maintained in shared spreadsheet files. And with TrustWorks, you get the added benefits of full client support from BMS and a variety of distribution support services.

TrustWorks is built on flexibility to support the needs of a variety of professionals, including:

- Liquidating and Post-Confirmation Trustees
- Receiverships
- Disbursing Agents
- Plan Administrators
- Assignees for the Benefit of Creditors

Let us show you how easy it is to make TrustWorks a key component of your business. Contact BMS to set a date and time for a demo.

## Key Product Features

### Streamlined Case Administration and Claims Management

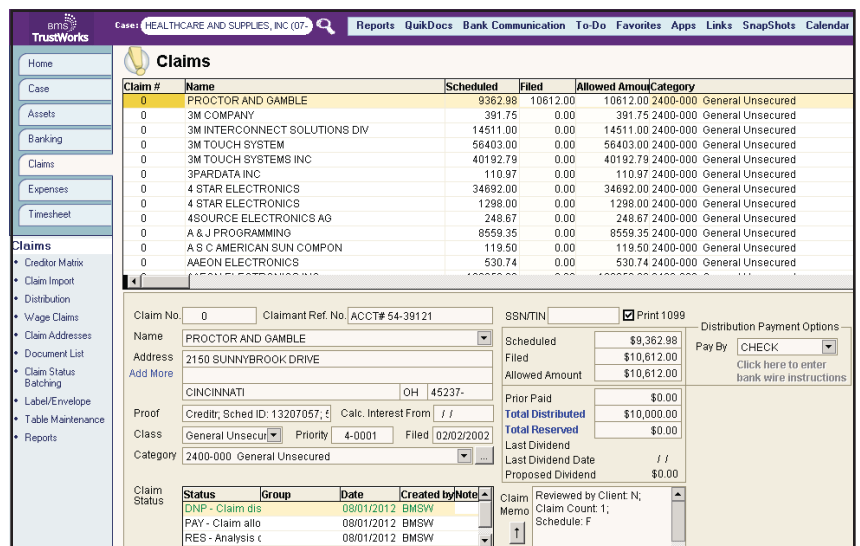

TrustWorks helps you manage cases and claims both effectively and efficiently, saving you considerable time and effort. You can withhold specific claims from distributions, allowing interim disbursements on allowed claims during the distribution process.

### Secure, Integrated Private Banking

BMS is in alliance with Rabobank, N.A. – part of the Rabobank Group, one of the world’s safest banks for over 10 years – to provide you the most robust, secure banking services available. With our integrated banking options you can open and close accounts, transfer funds, and issue stop payments directly from your computer, smart phone or tablet. With our built-in automated monthly banking reconciliations, all your records are accurate and compliant. And our in-house, private banking team provides you with experienced, personalized and highly professional support.

### Automated Check Generation

Creating checks for claims disbursement is simple—the integrated banking feature in TrustWorks automatically calculates each claim and generates the check for printing on your office printer. Or let BMS handle your check printing and distribution: we offer a broad range of options including e-signatures and mail-merged, personalized transmittal letters with your checks.

# TrustWorks® vs. Other Software

Key Features	TrustWorks®	Excel®	QuickBooks®
Automatic Banking Capabilities	✓	✗	✓
Automated Check Distribution	✓	✗	✗
Tracks Distribution Data	✓	✗	✗
Tracks Distribution History	✓	✗	✓
Tracks Reserve Accounts	✓	✗	✗
Tracks Claims Data	✓	✗	✗

## Standard Reports—And Customized Ones

TrustWorks imports data from Excel, QuickBooks, PACER and other file standard formats, allowing you to create a wide variety of accurate reports—all while avoiding user-introduced formula errors common in spreadsheet software. BMS will even create custom reports for you—just tell us what you need.

## Easy Document Management

TrustWorks allows you to easily locate, retrieve, organize and archive documents and case files, receive instant notifications of new files available, and immediately retrieve the most current documents with a simple click. TrustWorks centralizes a variety of file types and enables you to search, append, and print those items. And, if a BMS Web Portal is set up for a case, then case documents can be automatically displayed and distributed through the portal.

## Distribution Services

Our distribution services can create, print and mail your checks for you, freeing you and your staff to focus on other key issues. The result? Increased productivity and lower operational costs.

## Simplified, Seamless Data Imports

Our streamlined approach simplifies the importing of data from Excel, comma-delimited files and a variety of other formats into our TrustWorks platform.

We perform these imports regularly, so we know what to watch out for to make the transition as smooth and fast as possible. You can rest assured that your data will be set-up as planned and you will be fully trained on using TrustWorks. You'll find yourself up and running very quickly!

## What Our Clients are Saying

*“TrustWorks has been a major help to me in my claims management. One of its best features is that it allows me to set different categories for claims, such as transferred claims, amended claims and withdrawn claims. I can even set up separate creditors for the same claim when claims are transferred after being purchased by a claims trader. I can research a claim by case name or number within the categories I've established—and even by subset number. And the expanded notes section is particularly valuable, as it allows me to record and track the progress of each claim. TrustWorks definitely makes my work easier!”*

- Hank Spacone  
Sacramento, CA

*“I can do whatever I need to do with TrustWorks—it's extraordinarily flexible and easy to use, especially when it comes to making distributions. And if I need a particular creditor matrix, I can always call BMS Support and have it uploaded to my system.”*

- William Leonard  
Las Vegas, NV

*“We completely rely on TrustWorks in our business – it's especially good for tracking payments. But what we like best about using TrustWorks is that, in addition to being a great software solution for claims management, we know that if we run into any problems, we can always count on speaking to a real person, not a recording, when we call BMS for assistance – and that means a great deal to us.”*

- Christopher L. Picone  
President, Picone Advisory Group, LLC  
Chicago, IL

# Efficient and User-Friendly—the BMS Web Portal

## Customized, Centralized Access for All Involved Parties

### Enhanced Communication and Collaboration

Integrated with TrustWorks software, the BMS web portal provides you and all involved parties with access to multiple sources of information through one central location. The BMS web portal is designed for both public and private use, with a secure document area where a username and password must be provided to gain access to documents. The easy-to-use, intuitive portal allows all parties to collaborate seamlessly.

### Quick and Easy Access to Key Information

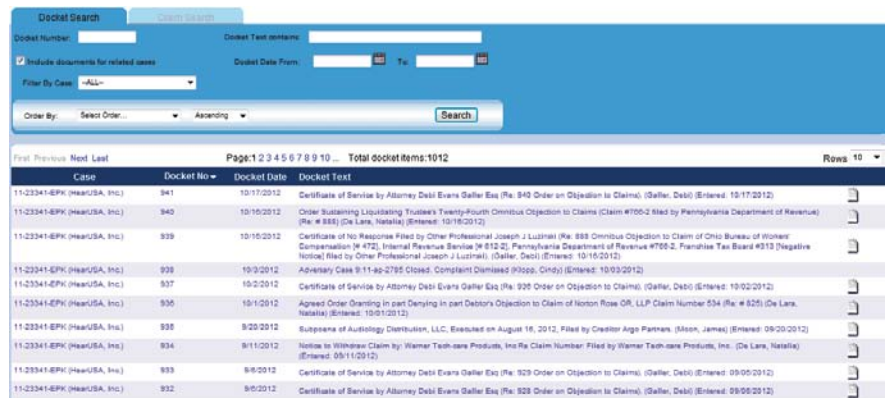

Your BMS Web Portal offers up-to-date, accurate information and distributes it to everyone involved in the case, so you no longer need to rely on costly third-party providers. With 24/7 access to your data, you and your constituents can quickly and easily find critical case and file claims data at any time.

### Simple and Cost-Effective Website Content Management

There are no set-up hassles or complicated software involved, so you can quickly and easily create, maintain and update your website content. Your customized Web Portal is both an elegant and highly cost-effective way to convey a professional image of the company throughout the process.

### Customized and Company Branded

Completely customized with a company's logo, colors and approved contact information, your BMS web portal provides you with a comprehensive, professional resource for information and services. Your existing company web site can easily be integrated with the BMS web portal for even greater efficiency.
